# TONIGHT'S DOOR PRIZE

## KAWASAKI KV75

First introduced by Kawasaki several years ago, this fun and utilitarian 73cc motorcycle has served as the training grounds for many first time riders. It has also proven to be the best of basic transportation for those who own motorhomes, campers, and mini-vans.

The model's three-speed transmission has a centrifugal clutch that eliminates the hassles of clutch depression. This helps to make the 1979 KV75 the perfect learner's motorcycle.

Equipped with a superlube oil injection system, the KV75 is also easily transported to those out of the way riding locations. The handlebars are designed to fold down for convenient stashing in the smallest of areas . . . even the trunk of a modest-sized car.

Again in 1979, this unique little runabout has a frame constructed of tough, tubular steel and it comes equipped with hydraulic shocks and forks. The KV75 has a U.S. Forestry Service approved spark arrestor.

Donated by  **Kawasaki Motors Corp., U.S.A.**
