AUCKLAND NEW ZEALAND

## Questions & Answers about new Freedent<sup>®</sup> Chewing Gum.

Q. What is special about FREEDENT gum?

A. FREEDENT is the new gum specially formulated so that it won't stick to most dental work.

Q. How serious is this problem?

A. The Wrigley Company has received many letters from consumers who do have a problem. People all over the world have said they would welcome a product that would enable them to enjoy chewing gum again.

That's why Wrigley's developed FREEDENT chewing gum.

Q. What exactly causes the sticking?

A. The surfaces of the synthetic materials used in the manufacture of caps, bridges, full dentures and other dental work do not retain moisture; they become dry almost instantly. So ordinary gum sticks. The FREEDENT gum formula overcomes this problem.

Q. Does FREEDENT taste good?

A. FREEDENT has a delicious mint flavour. The formula has no effect on the taste quality, so even people without a sticking problem can enjoy chewing FREEDENT gum.

Q. Where has FREEDENT been tried and how well did it work?

A. FREEDENT has become one of the most popular brands in the U.K., where The Wrigley Company first introduced it five years ago. It is now proving extremely popular in Australia and the U.S. where consumer reports show wide satisfaction and confirm its nonsticking properties in actual use.

Q. Where and when will FREEDENT gum be available?

A. Look for the bright blue packs of FREEDENT now available in chewing gum displays all over New Zealand. A package of FREEDENT will consist of five individually wrapped sticks.

Good evening everyone.

Tonight we present the New Zealand Final of the 1980 World Individual Speedway Championship Qualifying Round. Incorporated in this round is the New Zealand Motor Cycle Solo Championship with the reigning champion LARRY ROSS from Christchurch here to defend his title.

Wrigley's Freedent are the sponsors of this Championship and Qualifying Round.

All of the riders competing this evening have qualified from earlier trials held at Napier, Wellington, Tauranga, Christchurch, Invercargill and, of course, Auckland.

Six times and current World champion IVAN MAUGER had planned to compete here tonight for the N.Z. title but, unfortunately, is on the injured list and now hopes to be fit again to lead N.Z. against Australia in the Test Match at Western Springs on the 23rd February. We sincerely wish him a speedy recovery back to good health.

We extend all visitors, competitors, crews and spectators alike to McMillan Ford International Speedway a very warm welcome and trust you have a most enjoyable meeting.

To all competitors we wish you the "best of luck" and may the best man win.

Watch the papers and listen to Radio 1ZB and 1ZM for announcements of next meeting.

Speedway Track Promotions Ltd.

PLEASE NOTE: Sprintcar Track Record 8 laps is now 2m 21.5s by Roger Bertram, 26/1/80.

### RULES GOVERNING 1ZB SPEEDELLA

All you have to do is to correctly name the official placegetters in correct finishing order of tonight's "Speedella" race and PRINT the names on the entry form. Place the completed form into the tins provided around the stadium.

The tins will be collected prior to the running of the "Speedella" event and placed under lock in the office until the completion of the meeting. The results will be published in the following week's programme.

Should no correct entry be received, the prize will jackpot \$50 for the following meeting. The "Speedella" race or races will not necessarily be on the same events.

There is no entry fee and no limit to the number of entries, provided they are on a current programme.

In the event of their being more than one correct entry, then the first correct entry opened will be deemed the winner.

The judges' decision is final and no correspondence will be entered into.

The Management, staff, officials and competitors of McMillan Ford International Speedway are not permitted to lodge entries in this competition.

**IMPORTANT NOTICES**

Speedway Racing is dangerous and all persons attending do so entirely at their own risk. It is a condition of admission that all persons having any connection with the promotion, organisation and/or conduct of this meeting, including the owner and lessees of the stadium and the owners and drivers of the vehicles, are absolved from all liability arising out of accidents causing damage to property or personal injury to spectators or ticket-holders.

Should it be necessary, owing to rain, mechanical or electrical failure, or through any cause whatsoever, to abandon tonight's Speedway Meeting before the SIXTH EVENT, tonight's admission ticket will entitle you to admission to another meeting to be announced and run at a later date. MONEY WILL NOT BE REFUNDED UNDER ANY CIRCUMSTANCES WHATSOEVER.

It is an offence to consume intoxicating liquor on these premises.

BETTING is absolutely prohibited at Speedway Meetings.

The Management reserves the right to make alterations or additions to this programme.

ALL COMPETITORS RACE AT THEIR OWN RISK.

**NO DOGS ALLOWED**

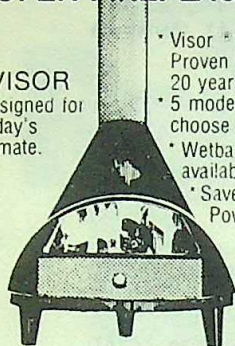

Dogs are not permitted in this stadium during the conducting of a Speedway Meeting except those used by the Registered Dog Patrol.

For years we've warmed your home — now we'll keep your kitchen clean!

## NEW ZEALAND FINAL of WORLD SOLO CHAMPIONSHIP QUALIFYING ROUND incorporating NEW ZEALAND SOLO CHAMPIONSHIP

---

### Regulations

The riders are identified by their helmet colours. Start-line positions are: Red (inside), Blue, White, Yellow and Black (outside). The winner of each heat gains three points, second two points, third one point. The over-all winner will be the rider achieving the highest total of points for the meeting.

All heats are raced over four laps.

In the event of a tie for first, second or third place, a deciding race (or races) will be held after Heat 20.

The 4 lap Track Record is 1m 9.2s held by Ivan Mauger (New Zealand)

Track Length: 408 metres

### OFFICIAL F.I.M. STARTING RULE

#### F.I.M. regulation 21.66.1:

"... A driver who breaks one tape or the tapes or crosses the starting line with both wheels of his motorcycle shall be excluded . . . in individual events he shall be replaced by a track reserve.

"If, because of faulty operation of the gate or for any other reason, the Referee considers the start to be incorrect, he shall immediately stop the race with the 'stop' signal and order a re-start in which the drivers shall occupy their original starting positions.

"After the green light has been switched on, no time allowance can be given and no outside assistance can be rendered to drivers except for a driver who has fallen or if the engine stopped after the signal when, after the gate is up, he may be assisted by two pushers for a distance of 30 metres. If, at that point, the engine does not start, the driver in question shall be excluded from the race."

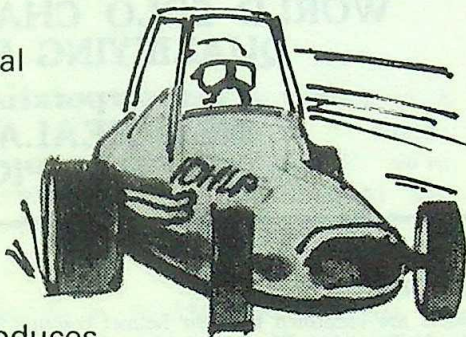

# MSD

## IGNITION CONTROL

### ALWAYS A WINNER!

When you need total power, you need the MSD Ignition Control.

MSD means multiple spark discharge. MSD Ignition Control produces *a whole series* of high energy sparks that increase your car's power, increase performance, improve fuel economy and make tune-ups last miles longer.

**PUT TOTAL POWER IN YOUR CAR.  
FIT THE MSD IGNITION CONTROL.  
TOTAL POWER.**

Available from service stations and auto electricians.

**SO YOU WANT  
POWER!**  
*Here it is...*

**34  
WATTS  
TOTAL  
R.M.S.**

*No need to spend money  
on a booster amp it's all  
in one...*

Give your ears a treat!

**RCP4 Hi-Power Radio/Stereo Cassette  
Player — \$240.00 (bare).**

Price is for player only as several types of speaker  
configurations available.

This beauty delivers a massive 34 WATTS TOTAL OUTPUT  
a 240% power increase over the average radio cassette  
player. Its small compact size ensures an easy fit into all  
cars and with a plug on wiring loom and through front dial  
aerial trim its a pleasure to install. Big in sound power  
with a low, value for money price tag.

## AUTOMOTIVE CHEMICALS

### CRC 5-56

Is the tool box in a can. Penetrates to loosen stubborn nuts, bolts, etc., and lubricates at the same time. A thin film of **CRC 5-56** is left on sprayed parts giving future protection against corrosion.

### CRC 5-56

Displaces moisture in wet engines. Spray onto sparkplugs, leads, coil, distributor, etc. Moisture is displaced by a film of conductive **CRC 5-56**.

### CRC BUFF

Protects and beautifies vinyl, rubber, leather, plastic, fiberglass and chrome. Stops rot in these materials caused by oxygen, ozone and ultra-violet.

### ENGINE DE-GREASER

Simply spray on and hose off. Removes built up dirt and grease. Improves engine cooling.

### CRC ENGINE START

Simply spray into carburettor air intake before starting. Gives a higher volatile mixture for easy ignition in cold weather. Saves excessive drain on battery — prolonging its life.

### CRC BRAKLEEN

Spray onto oil or dirt impregnated linings. Dissolves away oil, grease and dirt without harm to linings. Can improve braking efficiency up to 24%.

### CRC 666 MARINE FORMULA

Ends damage due to salt water. Drives out moisture and forms a continuous non-drying protective film which never becomes brittle. **CRC 666** penetrates, loosens scale and dirt, cleans and lubricates.

## 4 VITAL COST-SAVING REASONS FOR ADDING

### 1. BETTER PROTECTION

#### WYNN'S FOR OIL

Boosts power, restores compression, protects engine against harmful acids and prevents oil oxidation. Reduces oil consumption & exhaust smoking, also quiets noisy engines, gear-boxes and differentials, and postpones costly repairs. Scientifically formulated for **NEW & OLD** cars, petrol or diesel trucks, tractors and marine engines.

### 2. IMPROVED PERFORMANCE

#### WYNN'S ENGINE TUNE-UP

Quietens hydraulic valve lifters. Works in ten minutes while you drive — keeping valves, lifters and rings free from sludge and varnish build-up. Repowers sluggish engines. Guaranteed.

### 3. MORE MILEAGE

#### WYNN'S FOR GAS

The proven gas power booster. Improves mileage and performance. Cleans the entire fuel system and **KEEPS** it clean. Protects fuel system from rust and corrosion.

### 4. SMOOTHER RUNNING

#### WYNN'S LUBRICANT SUPPLEMENT

High performance lubricant supplement for conventional and limited slip differentials. Also for gearboxes and assembling engines, bearings, etc. Reduces friction and heat. Prevents corrosion, quiets squeaky rocker arms, has anti-foam action & will not cause synchronizer glazing.
